Victor® Concept for School Sport

The Basic Concept:

The basic idea of the concept is to teach beginners the perfect hitting technique. The shortened racquets, tailored to the age of the players, as well as the teardrop-shaped head guarantee good handling and easy hitting of the shuttle.

The Benefits:

- The racquets are perfect for learning the optimum hitting technique
- All racquets have the innovative learners' handle which prevents them holding the racquet incorrectly
- The racquets have different shaft lengths so that players of all ages and skills levels can benefit from optimum handling
- The teardrop-shaped heads of the 'Starter', 'Advanced' and 'Training' models optimise the hitting point as timing and hand-eye-coordination are not yet fully developed in children
- The racquets provide a perfect introduction to the sport of badminton
- All of the racquets are tailored to the needs of children
