✓ **Anti-slip film inside the armhole section**

1 | Flipper SwimSafe Swimming Aid

With the Flipper SwimSafe, your children can have carefree fun in the pool. The unbreakable PE foam core and the air chambers with valves ensure perfect buoyancy. There is even enough buoyancy to keep your child above water when the air chamber is damaged and buoyancy can be individually adjusted. Unrestricted free movement. The body is stabilised and the neck and back muscles are relaxed. For children aged 1–6 years. Swimming schools recommend Flipper SwimSafe as the ideal product for beginners, to get the children used to the water and to make swimming easier. Complies with EU standard EN 13138. Now even safer, thanks to anti-slip film in the armhole section.

- ✓ **Inflatable air chambers**
- ✓ **Internal foam core**

2 | Bema 'Duo Protect' Armbands

With these swimming aids, even the smallest children can always keep their heads above the water. In addition to the inflatable air chambers, these armbands have sturdy foam cores that provide additional buoyancy – ensuring the child benefits from the highest level of safety possible while swimming. Even if the air chambers become damaged, the armbands provide enough buoyancy to keep a child above water. For children between 18 and 30 kg as well as aged 3–6. Complies with EU standard EN 13138-1:2014.
