Accessories

4 | Malmsten 'Lane Line Slider' Swimming Lane Line Saver

This 'slide' makes it easier to unroll and roll up your competition lines quicker, easier, more conveniently and in a way that is more gentle on the material. Simply attach the swimming line to the edge of the pool and feed the line over the channel: the floats can no longer become caught on the edge of the pool. This prevents damage to the pool and also makes your swimming lines last

considerably longer. Fibreglass-reinforced polyester with rubber edges. LxWxH: 62x38x44 cm. Weight: 3.3 kg.

Malmsten Racing Lane Lines

Tried and tested at the Olympic Games and other major events. With these lines manufactured according to FINA and LEN regulations, you can create the optimal conditions for competitions – a key requirement for maximum performance. The plastic discs are strung onto the stainless steel cable. Optimal water calming effect: the discs break the waves before they cause turbulence in the next lane. The turnbuckle has a cover, whilst a differential spring on the opposite side ensures good positioning in the water. V4A steel. In standard colours red/white/blue (5 m red on each end, alternating white/blue in the middle section). **Other colour combinations available on request for an additional charge of approx. 10%.**

1 | Classic

With standard floats, ø 10 cm.
