"Very easy to assemble and use."

**With automatic lowering mechanism:**

Without load: mobile

With load: will not move

## 1 | Sport-Thieme Safety Moving Device

Developed to prevent improper use and to provide more safety when transporting vaulting boxes. The device can carry the entire weight of the vaulting box, making it easy to move around. As soon as any weight is added to the vaulting box the device lowers automatically – the vaulting box stands on its feet and is not mobile. Once the weight is removed, the device will rise again and the box can be moved. Once the vaulting box has been moved, it can be lowered onto the sturdy feet by using the operating lever. The box must only be used for gymnastics when lowered. Sturdy metal construction with four smooth-running swivel castors. With automatic lowering mechanism and adjustable springs. Reduces wear of the boxes. Can be retrofitted to all DIN-standard boxes. With comprehensive assembly instructions. **10-year guarantee!**

**Exclusive to Sport-Thieme**

**10-year guarantee**

71 121 7344

Each

Approved by TÜV Austria, certificate no.: 0331-PS16-123.4-Z

## 2 | Sport-Thieme Swivel Castor Kit

The four swivel castors make moving vaulting boxes around the sports hall safe and easy, even for children. The kit can also easily be fitted to your existing vaulting boxes. Comes with instruction manual. Maximum load 110 kg. Base of box not included. **10-year guarantee!** For 4-, 5- and 6-part boxes

Set of 2

## 5 | Sport-Thieme Gymnastics Bench and Vaulting Box See-Saw

Expand the functions of your gymnastics benches and vaulting boxes with a few tricks. Easy to assemble: simply turn the gymnastics bench so that the sitting surface is facing down and place the see-saw sections on each end of the bench. Alternatively, the wooden skids can be attached to the upper part of the vaulting box. The skids have separate openings for this. Side sections made of birch plywood (21 mm), rungs made of ash, 35 mm. LxW: 55x15 cm, approx. 3.5 kg (pair). Can hold up to 150 kg (incl. bench / box top).
