

**Experts say:****Gabi Frehse**

Head trainer at the Olympic training centre in Chemnitz, including for bronze medallist Sophie Scheder

*"Joints between adjoining sports mats present a risk of injury. The special joint flap system seals these gaps and provides a non-slip hold and safety during gymnastics."*

**Uses:**  
floor exercises,  
dismounts with a  
drop height of up  
to 60 cm

**Suitable for:**  
schools,  
clubs and  
nurseries

**Surface and underside:**  
textured  
gymnastics  
mat material

**Core:**  
composite  
foam

**Flaps for**  
**covering**  
**joins**

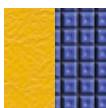

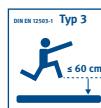

**Combi gymnastics mat**

Offers excellent stability on landing

**4 | Reivo Combi Gymnastics Mat**

Complies with EN 12503-1 type 3 standards. Composite foam core, 120 kg/m<sup>3</sup>, made of high-quality composite foam. Coated in fleece which gives the mat a high level of elasticity and makes it very stable on landing. Completely covered with strong textured gymnastics mat material with tear-proof backing fabric (100% polyester). With flaps for covering joins and a concealed zip.

**joins**

**'Safe' Combi gymnastics mat**

A safe gymnastics mat for children and young people

**5 | Reivo 'Safety' Combi Gymnastics Mat**

Complies with EN 12503-1, type 3.

The core is made of a sandwich-style construction. Super light yet firm, flexible composite foam (120 kg/m<sup>3</sup>) which provides high elasticity yet good stability. The mats are much lighter to handle. With connecting system and a concealed zip.

Available with two different covers:

- **Made of textured gymnastics mat material:** strong 100% polyester, durable with tear-proof support fabric.
- **Made of Polygrip mat material:** 100% polyester in blue, yellow, red or green with grained embossing. Tensile strength of 2,500 N, 600 g/m<sup>2</sup>.

See table for available versions.
