Core: foam and light foam

Flat, flexible landing side for stability when dismounting

Wrong side for landing

1. Soft mat

Flexible soft underside made from high-quality polyether foam for uncontrolled landings

2. Landing mat

Flat, flexible landing side for stability when dismounting

Variable non-slip strip

1 | Sport-Thieme Combi Reversible Mat

Sandwich-style core:

The 2-in-1 universal mat for school gymnastics. One side is a flat, flexible landing mat providing a high level of stability for dismounts and during gymnastics exercises. The other side is a soft mat for the highest level of safety during gymnastics and uncontrolled landings.

Landing mat side: Core made of light foam (30 kg/m³), cover made of high-quality needle felt layer in compliance with EN 12503-6.

Soft mat side: Core made of soft, high-quality polyether foam (20 kg/m³). Top and sides are made of coated 100% poly-

ester tear-resistant material (2,600 N/5 cm), 600 g/m², with 10-cm-wide fleece strip for combining seamlessly with other mats.

Mat with loops on the sides and 6 tear-resistant carry handles. **The non-slip strip** (width 90 cm) is attached, similar to a hinge, to the side of the mat ensuring the mat can be made non-slip when required.

Size (LxWxH): 300x200x30 cm, weight: approx. 70 kg.

Hook-and-loop strips for seamlessly connecting mats in a row

Accessory for 1|

Accessory for all soft mats

i Recommended by safety experts

The Sport-Thieme Combi reversible mat is recommended by accident insurance agencies. The needle felt cover is securely bonded to the core, meaning

there are no creases on the cover. The non-slip mat, which can be used on both sides, reduces the risk of injury.

2 | Sport-Thieme Joining and Fixing Strip

For securely joining 2 Sport-Thieme Combi reversible mats together. Important: a joining and fixing strip is only necessary if there is more than one mat. LxW: approx. 350x30 cm.

71 119 4702 Each

3 | Sport-Thieme Non-Slip Underlay

Holds soft mats in place. LxW: 300x96 cm.

71 119 7105 Each

Uses: exercises with a max. drop height of 2 m

Suitable for: schools and clubs

Surface and underside: canvas material

Core: PU foam and PE foam

4 | Sport-Thieme Soft Landing Mat

Complies with EN 12503-1 type 8. A great-value alternative with a special design. The yellow side is made of a 40-mm lightweight foam core. The blue side is 25-cm polyether foam and can be used as a soft floor mat. Complete with 100% polyester canvas cover which is very firm and ensures secure positioning. For additional safety, we recommend using the non-slip underlay for both sides. LxWxH: 300x200x30 cm, approx. 70 kg.
