

New!

- 1 | ✓ For leisure centres, schools, nurseries and playing fields
- ✓ Dynamic games are guaranteed, no getting stuck in a corner
- ✓ Easy to clean and low levels of leaf litter

1 | New! Dutch Panna 'PK 3000' Court

This sports arena is the perfect place for players to really show off their skills. Ideal for various games, such as Panna or dodgeball. Just set up the court once and the game can begin whenever you like.

The functional sports arena with integrated goals is ideal for beginners as well as for training ball skills and technique in football clubs. Can be used in public areas such as playgrounds and parks, as well as on school playgrounds and sports fields, and in other educational and leisure centres. With its diameter of 6 m and low

fence height, the court offers plenty of space for players. The low height keeps the game contained, but also doesn't close players off from their environment. The 'PK 3000' Dutch Panna court's round shape also ensures a dynamic display by preventing the game from stagnating, stuck in a corner.

The 'PK 3000' Dutch Panna court is firmly secured using chemical anchoring in concrete or tarmac. The screws required for this are then covered with rubber caps.

New!

- 2 | ✓ For leisure centres, schools and nurseries
- ✓ Can be simply set up on a surface, or chemically anchored to concrete, tarmac or stone
- ✓ Walls provide space for advertising and logos

2 | New! Dutch Panna 'PK 3001' Court

This sports arena is ideal for a variety of ball games, such as Panna, 3v3 football or dodgeball, and is great fun for all ages. Simply set it up, either with or without ground anchoring, and the game can get started.

The sports arena has a diameter of 6 m and a fence height of 0.75 m. This means it doesn't close players off from their environment and offers plenty of space for players of all ages. The arena is therefore ideal for use on school playgrounds, in nurseries as well as in leisure centres. The round shape prevents the game from stagnating, stuck in a corner. It is also quick and easy to re-

move leaves. What's more, the 8 wall panels provide space for logos and advertising. The 'PK 3001' Dutch Panna court is made of corrosion-resistant materials.

The sports arena can be simply positioned, or it can be chemically anchored to concrete, tarmac or stone. Any screws used to anchor the arena are then covered with rubber caps. The arena consists of 8 panels.

Rolled steel tubing (50x50x2 mm), galvanised; 8 wall panels made of 6-mm-thick Dibond sandwich sheeting (aluminium/plastic/aluminium). Arena height: 0.75 m. ø 6 m, 400 kg, grey. Space required: approx. 7x7 m.
