Very bouncy 'elephant skin' foam ball. Size 5.
71 269 4203-1 275 g, orange Each
71 107 1506-1 335 g, white Each

Volleyballs

Regular volleyballs are size 5 (ø 21 cm) and weigh 260–280 g.

Volleyballs for learners are lighter, allowing for games and training sessions that are free from fear.

Volleyballs for technique training are made of soft foam and are a little heavier.

The **Sport-Thieme lightweights** are new: they are as light as a feather, and fly slower and less powerfully, making it as if in slow motion. Makes training double the fun for beginners, children and older people – more time to get ready for the approaching ball. Fear of fast and unexpected balls disappears. These balls are made from a very high-quality polyurethane material that is robust and long-lasting despite its low weight, even during use at school.
